

# Get to know VITALISE project

Virtual Health and Wellbeing Living Lab Infrastructure

Tue, April 20, 2021  
12:30 PM – 17:30 PM CEST

## Agenda

VITALISE is a European-funded H2020 project coordinated by the European Network of Living Labs. Running from April 2021 to March 2024, VITALISE tries to Harmonize the procedures and services of Health and Wellbeing Living Labs across Europe and beyond in order to make the Living Labs research infrastructure open and easily accessible to the research community in Europe and worldwide.

Living Lab research infrastructure should provide easy access to technology and data and to do so, VITALISE will design and develop ICT tools for shared access of similar devices and applications used across Living Labs, as well as for collecting, storing and sharing datasets. VITALISE will enhance closer interaction between multidisciplinary researchers among and beyond the consortium partners through the Joint Research Activities, Transnational Physical and Virtual Access.

On Tuesday 20th of April our kick-off meeting session will be open to the public.
